

Animal Movement Reporting

Putting them in the pasture is only the first step.

Movement information is not mandatory, but still important, not just for your own records, but also to aid in the control of animal disease.

Entering animals as moved-in or moved-out in the CLTS database can make a big difference when it comes to keeping your cattle safe and disease free.

To find out more go to cia.livestockid.ca or call 1-877-909-BEEF.

A few minutes today can mean the world tomorrow.
